Experienced in designing database solutions and creating dynamic and innovative websites that have enabled the development of skills such as task assignments, leadership, communication, teamwork.

PROYECTS

Full Stack Web Developer - Videogame-app   abr. 2023 - may. 2023

Academic Experience. Henry Bootcamp

Constructed a Single Page Application to showcase a variety of video games, utilizing the RAWG API for data integration. Demonstrated strong proficiency in frontend technologies such as React, Redux, while also utilizing backend tools including Node.js, Express, and Sequelize for database management. Implemented essential styling and design elements to enhance User Experience (UX) and User Interface (UI). This project effectively solidified theoretical concepts acquired during my studies, facilitating hands-on learning of industry-standard practices. Additionally, I mastered the GIT workflow and delved into testing methodologies, underscoring the comprehensive nature of the project.

Front: React, TailwindCss, Javascript, HTML, Redux
Back: Node.js, Express,GIT
Base de datos: PostgreSQL y Sequelize.
Deploy: https://pi-videogames-main-ab7z-git-main-lucianomas26.vercel.app/
